Objective

A highly accomplished and versatile full-stack engineer, proficient in a wide array of technologies including JavaScript, React, Bootstrap, Next.js, Node.js, and Java. Proficient in database management, with a strong command of both MySQL and NoSQL databases. Additionally, I possess valuable cloud expertise, having worked extensively with Amazon Web Services (AWS), Google Cloud Services, and Microsoft Azure cloud. My skill set extends to designing and implementing RESTful and GraphQL APIs with ease.

Skills: Java, Spring Boot, Spring Data, hibernate, NodeJS, ExpressJs, Javascript, Tailwind, Typescript, HTML, CSS, TDD, Junit, MySQL, NoSQL, Oracle, MongoDB, GraphQL, D3js, ReactJS, NextJs, REST APIs, JSON, AWS, GCP, Azure, Kubernetes, Lambda, Cognito, S3, GIT, Github, microservices, Agile methodologies, Docker, Kafka, CI/CD pipelines.

Upwork(Freelance) | Software Engineer | Remote

08/2020 - Present

- Develop and maintain robust, scalable, and high-performance back end solutions using NodeJs, Express, Java, and Spring Boot.
- Design and implement RESTful APIs and microservices architecture to support various applications.
- Develop frontend components using React.js and NextJs, including user interfaces, components, and state management.
- Collaborated closely with clients and stakeholders to understand their project requirements and objectives. Maintaining clear and effective communications.
- Troubleshoot and resolve technical issues, identifying and implementing improvements as needed.
- Design, develop, and implement software applications using the Spring framework and React.js.
- Develop backend components using Spring Boot, including RESTful APIs, data models, and business logic.
